

ABS LABOUR FORCE SURVEY
NOVEMBER 1978

HUR920

0001

Figure 1 displays the time evolution of the system for various initial states. The figure is organized into two columns of plots, labeled (a) through (j) on the left and (a) through (j) on the right. Each plot shows the expectation value of a Pauli matrix (left column) or the expectation value of the Pauli matrix (right column) as a function of time (x-axis, ranging from 0 to 10). The y-axis represents the expectation value, ranging from -1 to 1. The plots illustrate how the system's state evolves over time for different initial conditions, showing oscillatory behavior that changes as the system size N increases from 2 to 10.

ABS LABOUR FORCE SURVEY
NOVEMBER 1978

HUR920

0001

Figure 1 displays 20 plots arranged in a 10x2 grid, showing the evolution of the number of particles in different states over time. The left column shows the number of particles in the 'n' state, and the right column shows the number of particles in the 'm' state. The rows correspond to different values of the parameter 'k' (1, 2, 3, 4, 5, 6, 7, 8, 9, 10). Each plot has 'Time' on the x-axis and 'Number of particles' on the y-axis. The plots show a general trend of increasing particle number over time, with some fluctuations. The right column plots also include a legend for 'n' and 'm' states.
